SHIRA A. SCHEINDLIN, U.S.D.J.:

SUPPLEMENTAL
ORDER

10 Civ. 3488 (SAS)

I. INTRODUCTION

On February 7, 2011, this Court issued an Opinion and Order (docket no. 41) in this case requiring, *inter alia*, that all electronically stored information (“ESI”) be produced in a specific format. On pages 20-23, I ordered Defendants to include certain metadata fields in the load files accompanying all future static image productions. This Order clarifies that the absence of “Full Text” from the list of required “metadata fields” was an oversight. Like the nine metadata fields listed on pages 20-21, “Full Text” – *i.e.*, the body text of a document, attachment, or email message, extracted directly from the electronic source or derived by optical character recognition of scanned paper documents – should also accompany

any production of a significant collection of static image ESI.¹

SO ORDERED:

A handwritten signature in black ink, appearing to read 'Shira A. Scheindlin', written over a horizontal line. The signature is cursive and extends to the right of the line.

Shira A. Scheindlin
U.S.D.J.

Dated: New York, New York
February 14, 2011

¹ While important to clarify, this oversight does not affect Defendants' production requirements in this case. This is because the first page of the Proposed Protocol, attached as Exhibit A to the February 7 Opinion and Order, ordered that

[e]xtracted full text in the format of multipage .txt files shall be provided. The total number of text files delivered should match the total number of TIFF files delivered. Each text file should match the respective TIFF filename. Text from redacted pages will be produced in OCR format rather than extracted text.

Although I declined to order all of the metadata fields requested by Plaintiffs in the Proposed Protocol, I explained on page 23 that "all of the other format requirements in the Proposed Protocol with respect to both ESI and hard copy are hereby ordered." Therefore, the absence of "Full Text" from the list of required "metadata fields" on pages 20-23 did not excuse Defendants from producing text files accompanying each TIFF file.
